Stunning Technology.

“Content providers are the clearest winners from the widespread adoption of HTML5. Instead of having to develop dedicated applications for each mobile platform, to give their customers a compelling experience, they will be able to offer a single, HTML5-based offering that will run across desktops and mobile devices — greatly reducing their development costs.”

David Cardinal, extremetech.com

Stunning technology.

Stunning Technology.

Your flipgorilla publications don‘t just work on your desktop computer. We have developed flipgorilla using latest web technologies to also bring this outstanding experience to all major tablets and smartphones.

Easy Creation.

> *We sorely need independent innovation in digital publishing. We need talented people who are willing to try things. (...) The ideas are there; the talent is there; the readers are there.*

Tim Carmody, wired.com

DESCRIPTION
CREATE

Easy Creation.

To publish a document with flipgorilla, there is just one step to take: upload your PDF. It will be converted immediately, maintaining a continuously growing number of enrichments, and will immediately be available for integration in your website or blog.

Share and Embed.

> *Traditional publishers pretty much do nil when it comes to marketing a book, unless you're Stephen King or happen upon a hit about sparkly vampires. We have to turn to resources like social media to get the job done.*

Erika Napoletano, author of The Power of Unpopular

Share and Embed.

The widespread distribution of your publications is easier than ever. flipgorilla provides you with:

- ✓ one-click-sharing of your publication on all major social networks
- ✓ a direct link to spread your publication via email or instant messaging
- ✓ a simple embed code to seamlessly integrate your publication into your website or blog.

Enrichment.

> *It* **is** *possible for interactivity to go beyond the superficial, to add value to the book and create an experience that would be impossible in print.*
